Acknowledgement of Country

We acknowledge that Murdoch University is situated on the lands of the Whadjuk and Binjareb Noongar people. We pay our respect to their enduring and dynamic culture and the leadership of Noongar elders past and present. The boodjar (country) on which Murdoch University is located has for thousands of years, been a place of learning. We at Murdoch University are proud to continue this long tradition.

Murdoch University

At a glance

We commit to our purpose with clear and strong founding principles, centred on providing inclusive education to all who can benefit, irrespective of social standing and background.

Introduction

Murdoch University is a young, vibrant and globally-networked university based in Perth, Western Australia. We are highly engaged in living our purpose: To be a creative force for current and future generations.

For almost 50 years Murdoch University has dared to be different. We were established as Western Australia's second university, with a mission to write a new script for free thinkers seeking to further their education at an outstanding institution. Sir Walter Murdoch, after whom our University is named, remains an inspiration for that determination when he said, "The only education out of which good can come is the education which teaches you to think for yourself, instead of swallowing whatever the fashion of the moment may prescribe."

Our campus enjoys a magnificent bush setting on the ancestral lands of the Whadjuk and Bindjareb people of the Noongar nation. It has been a place of learning for thousands of years, and we continue this proud tradition of teaching, learning and discovery with great respect for the land on which our University is built and through maintaining strong connections with First Nations people.

We commit to our purpose with clear and strong founding principles, centred on providing inclusive education to all who can benefit, irrespective of social standing and background. These principles form an important foundation for the culture of Murdoch University, carrying a social ethos across our institution that strives to create cultural safety for all that engage with us, including First Nations peoples. We are proud of our track record of positively supporting part-time student participation, achievement of 'first in family' degree outcomes

and the provision of multiple education pathways for mature-age students.

Over our history, we have built an outstanding global reputation for the quality of our research, learning and teaching – nurturing talented free thinkers who contribute positively to society.

With more than 25,000 students and 1,800 staff across our campuses in Perth, Singapore and Dubai, Murdoch University has an ambitious agenda that requires an equally bold leader.

Our story and strategic vision

It is only when we unleash the creative force that is free thought, that we find new ways to move forward. Murdoch University is where free thinking makes progress; empowering everyone to think in a way that will improve their lives, and shape our world for current and future generations.

The Murdoch Story

No one can predict the challenges and opportunities that lie ahead and from our origins as the 'alternative' in university education for Western Australia, Murdoch University has always believed in the importance of free thinking: ready to respond, to adapt and to challenge conventions.

Murdoch University was established by the Murdoch University Act 1973, which prescribed the objects of the University to be the advancement of learning and knowledge, and the provision of university education.

When told back in 1970 that Western Australia's second university would bear his name, Sir Walter Murdoch said, "it had better be a good one," so it is not surprising that

we possess a never-ending determination to achieve and take on the world's big challenges.

With a global outlook, our mission to be part of solving world challenges may be lofty, but we've always kept our feet firmly on the ground. So while courageous and 'can do', we maintain balance and perspective, which steers us towards activities that truly matter and sees us favour purpose over pretence.

We believe that to think for yourself is to think for the future, because we've seen the power of unconstrained thinking and how it can drive world-changing outcomes.

Even the smallest thought has the potential to make the biggest impact if it is given the

right conditions to grow and develop. That's why we foster an inclusive and collaborative environment that encourages the type of free thinking needed to overcome problems and unlock opportunities.

Established as a genuine university from day one, we've upheld the traditional role of a university without conforming to the traditional barriers.

We reject the notion that intelligence should be coupled with elitism, and place academic aspiration and accessibility side by side. This ensures that through our teaching and research we enable more people to make a greater difference to the communities we serve, both local and global.

Our Vision

Our vision is that Murdoch University will be widely recognised as the university of choice for people who care, who value inclusion, curiosity and innovation, and who desire to make a positive social impact. We will be a leading university in education, teaching and research in sustainability; a thriving, welcoming, diverse and inclusive community. Murdoch University will be the university of first choice for First Nations peoples, promoting and benefiting from Indigenous knowledges. Our quality education will be contemporary, accessible and inclusive. Our graduates will be keenly sought by employers and will be known for having adaptability, fresh perspectives, practical skills and a social conscience. Our research will be impactful, and we will have strong industry and institutional collaborations.

Our Shared Purpose

To change lives and society for the better through accessible education and research, contributing to the solution of societal and environmental challenges and providing an inclusive, caring community in which everyone can realise their potential.

Our Values

These five values guide how we behave individually and as a collective as we undertake our purpose.

Authenticity

Integrity

Respect

Inclusivity

Openness

Our Principles

These eight principles guide how we lead, manage and work together.

We will:

- Act with justice, respect and responsible care
- Be collegiate and respectful of other points of view
- Protect academic freedom
- Be agile, flexible and resilient
- Make decisions at the most appropriate level
- Be transparent in decision-making and with information
- Adopt common approaches to common tasks
- Be careful stewards of our resources

“The only education out of which good can come is the education which teaches you to think for yourself, instead of swallowing whatever the fashion of the moment may prescribe.”

Sir Walter Murdoch
1926

Our Strategic Themes

These strategic themes will guide and shape much of our activity over the lifetime of the Strategy.

Sustainability

Be a leading university in education, teaching, and translational research in sustainability, nurturing mindsets and creating solutions for a better and more sustainable world, a university renowned for its commitment to, and expertise in, sustainability and environmental, social, and corporate governance (ESG), providing a model and the tools for behaving and operating sustainably.

Equity, diversity and inclusion

Build a welcoming, diverse and inclusive community and environment that is equitable and safe, and that provides a culturally safe and supportive environment where all members of our community can realise their potential.

First nations

Become the university of first choice for First Nations peoples, and an exemplar in embracing and promoting and benefiting from Indigenous knowledges and cultural inclusivity.

Our Core activities

Each core activity will be led at the Senior Leadership Team level by a Deputy Vice Chancellor (DVC) who will chair a university-level committee to oversee the core activity and alignment with the Strategy.

Education

Deliver contemporary, accessible and inclusive education, with a high quality and engaging student experience, producing graduates who are adaptable and have fresh perspectives and a social conscience.

Research

Increase our impactful and progressive research in our areas of strength and excellent research across our disciplines.

Engagement

Build engagement with our local community, our State, our Nation and our global society, creating mutually beneficial partnerships at all levels.

Murdoch University's detailed Strategy 2023–2030 is available on its [website](#)

Our students

The Murdoch student body is diverse, with more than 25,000 students, including 6,400 international and transnational students. It is our unwavering commitment to equity, accessibility and excellence that sets us apart.

We honour our responsibility as an institution of higher learning to realise equity in education access and success and we have a long record of achievement in this area. We also attract an increasing proportion of Western Australia's school leavers because of our comprehensive suite of offerings and commitment to quality learning and teaching. We are proud that our students come from a diverse range of backgrounds and take seriously our commitment to their success.

Over time, we have developed a range of flexible entry pathways to support and engage students who may experience educational disadvantages. Multiple admissions pathways are designed to ensure and promote access for disadvantaged groups and significant scholarships are awarded to assist financially disadvantaged students with the cost of commencing study.

Innovative partnerships with technical and further education colleges create entry pathways for vocational students and additional initiatives are offered to support Indigenous students and students with disabilities.

Murdoch has the highest proportion of domestic students from low socio-economic backgrounds (23%) of any Western Australian university, as well as the highest share for students who identify as Indigenous (2% of our enrolments).

In 2020, we recorded our highest ever number of Indigenous students and our support programs helped them remain engaged in campus life, with a retention rate of 81%. We are immensely proud of our social equity achievements and we continue to launch new initiatives aimed at growing this community and widening participation.

It is our unwavering commitment to equity, accessibility and excellence that sets us apart.

As new students transition into university life from often unconventional backgrounds, advice and support is always available. We take a student-centred approach to our services and through all our actions, we seek to foster a sense of belonging, a positive and seamless student experience, and quality support for wellbeing and academic success.

While the global pandemic saw international onshore and offshore enrolments decline, we remain highly supportive of this important branch of our University family. During this period, we launched an award-winning Embedded Learning and Study (ELAS) program for international post-graduate students. Seventy-one per cent of support given through our Student Assistance Fund was delivered to international students.

Our research and teaching staff are consistently acknowledged for their excellence in both rankings and awards. The high-quality education and distinctively Australian study experience we offer is greatly valued by our students.

Murdoch University continues to perform strongly in the independent Good Universities Guide and in 2021, was again awarded a 5-star rating for overall student experience, a benchmark we have achieved every year since 2019.

A global university

Three global campuses and more than 5,700 students in transnational campuses

A growing university

Full time equivalent student growth of 10% in last five years

A 5-star Educational experience

Received 5-stars for student support, teaching quality and student-to-staff ratios in the 2021 Good Universities Guide

A university of diversity

Highest Indigenous proportion of students in Western Australia, and students from more than 100 nations

From our Dean

Dr Henry Annandale educating MU students on their practical rotation

Dr Henry Annandale has worked in practice and academia in South Africa, where he graduated in 2002. After specialist training as a theriogenologist, he became board-certified by the American College of Theriogenologists in 2005, followed by further board certification with the American College of Veterinary Preventive Medicine in 2002. His clinical expertise is within theriogenology of domestic animals and wildlife. Having been trained in business, he served in several management roles over the last decade. His research interests include the use of reproductive technologies to optimise food production and the impact of infectious disease on reproduction. The latter aspect was the focus of his PhD from Utrecht University.

The veterinary program at Murdoch University has established a reputation for excellence since the first class graduated in 1979. Murdoch’s veterinary degree is globally accredited by the Australasian Veterinary Boards Council, the Royal College of Veterinary Surgeons and the American Veterinary Medical Association. Murdoch’s veterinary degree was also the first in Australia to receive accreditation from the AVMA. Since 2014, Murdoch University has offered a five-year veterinary degree program, comprising an integrated Bachelor of Science (Veterinary Biology) and Doctor of Veterinary Medicine (DVM). Introduction of the DVM, has enhanced opportunities to combine hands-on clinical training, veterinary professional life skills, research experience, and species-group electives across the DVM program. The School is well resourced with research and teaching facilities, student skills hub, anatomy museum, a large veterinary teaching hospital and a working farm, all located on the Perth campus.

Community engagement.....

The four dogs together are the latest Guide Dogs WA litter

Our learning and teaching

As the modern world rapidly changes, Murdoch University is changing with it.

Our high-quality courses are evolving to meet the expectations of students and employers, and the embedding of research within our undergraduate degrees not only allows students to develop highly marketable skills, but creates new opportunities for postgraduate study.

Boola Katitjin is set to become the new heart of Murdoch University's South Street, Perth campus. It will provide a technology-rich educational experience, providing students with a place to learn, connect and belong, along with flexible workspaces where all staff can meet, work, and engage with students and industry alike. It will deliver state-of-the-art learning and teaching spaces, allowing for more innovative use of technology and teaching approaches.

In 2023, Murdoch University established a new academic structure, made up of five colleges and seventeen schools.

The five colleges are:

- College of Business
- College of Environmental and Life Sciences
- College of Health and Education
- College of Science, Technology, Engineering and Mathematics
- College of Law, Arts and Social Sciences

Schools have been established within each college. These are:

College of Business

- School of Accounting and Finance
- School of Management and Marketing

College of Environmental and Life Sciences

- School of Agricultural Sciences
- School of Environmental and Conservation Sciences
- School of Medical, Molecular and Forensic Sciences
- School of Veterinary Medicine

College of Health and Education

- School of Education
- School of Nursing
- School of Psychology

College of Science, Technology, Engineering and Mathematics

- School of Engineering and Energy
- School of Information Technology
- School of Mathematics, Statistics, Chemistry and Physics

College of Law, Arts and Social Sciences

- School of Indigenous Knowledges
- School of Law and Criminology
- School of Media and Communication
- School of Humanities, Arts and Social Sciences

International outlook

Murdoch University is already recognised as one of the most international universities in Australia, and in the top 1% of the most globalised universities in the world.

We have successful and growing campuses in Singapore and Dubai. The academic future of universities in the modern world is critically dependent on global connectedness. This is not a new challenge to Murdoch University. Global responsibility was part of our origins and a global outlook has continued throughout our existence.

We have a renewed focus on seeking opportunities through collaboration, taking on the big challenges of our time and connecting with people across the world to stay relevant and contribute to global society.

While the COVID-19 pandemic has clearly made this a difficult time for the

sector to engage in traditional international student engagement,

Murdoch is pursuing a number of new international education opportunities with potential partners in key markets in South East Asia.

As a forward thinking and young university, our ambition is for more people from across the world to engage with us, study with us and benefit from our activities.

We enable our students and staff to be mobile to enhance their international experience and global identities through the numerous partnerships Murdoch has with overseas universities and organisations.

Our focus on being a 'global university' flows through to the partnership spaces, as we engage across the world and seek to identify partners which share our purpose and vision and with whom we can work to excel in the domains in which Murdoch is recognised.

Our commitment to Reconciliation

Murdoch University has for decades supported the advancement of Aboriginal peoples, recognising education as a powerful tool for self-determination, societal change and Reconciliation.

In 2018, we established the Ngangk Yira Research Centre for Aboriginal Health and Social Equity to address urgent and complex problems affecting Aboriginal and Torres Strait Islander Health and Social Equity.

This has recently been enshrined as an Institute, reflecting our continued commitment to progressive research for the benefit of First Nations People.

In developing our Reconciliation Action Plan (RAP), we sought guidance from an Honorary Panel of Noongar Elders in the areas of leadership and cultural advice to the broader University community.

This outstanding group of leaders has ensured that RAP strategies made across the University reflect Aboriginal and Torres Strait Islander insights, wisdom and expertise.

Our RAP provides a framework for the University to embed Aboriginal and Torres Strait Islander knowledge, perspectives and themes within the undergraduate and postgraduate curriculum and foster collaborations between our award winning Kulbardi Aboriginal Centre and academic disciplines in co-designing high-quality learning experiences.

We sought guidance from an Honorary Panel of Noongar Elders in the areas of leadership and cultural advice to the broader University community.

Our research

Research at the School of Veterinary Medicine aims to improve the health and welfare of animals, by focusing on four programs of research excellence.

- One health: improving the health of all animals through investigation of infectious disease transmission, diagnosis and management.
- Comparative medicine to improve health and welfare of companion animals through the study of non-infectious disease and injury.
- Production animal health and welfare: improve the health and welfare of food producing animals.
- Wildlife health

The Invasive Bacterial Diseases Group

Collaboration with established emergency and critical care sepsis researchers spanning basic and clinical veterinary research in the fields of immunology, biochemistry, and biomedical science. Our team combines skills and expertise in the diagnosis, treatment and clinical management of sepsis with direct experience in biomarker discovery. In keeping with the School's research priority in the field of 'One Health' this group actively collaborates with medical neonatal and adult medicine researchers and clinicians from King Edward Memorial, Fiona Stanley and Perth Children's Hospitals.

The Comparative medicine research group

Transfusion medicine

Blood products are vital to saving lives of animals that have suffered trauma or major surgery. Improving effectiveness and availability of life saving blood transfusion therapy or alternatives are essential.

Projects

Reducing adverse effects through Leukoreduction

Increasing availability of blood products by prolonging storage without reducing effectiveness

Effects of different fluid types on inflammation, kidney function and coagulation

Equine Respiratory Disease

Equine respiratory disease has a major impact on health but remains difficult to diagnose. Electrical Impedance tomography is ground-breaking technology that is addressing this challenge.

Projects

Development of new algorithms to identify indicators of airflow, airway constriction and dilation and identify different patterns of breathing

Biomechanics of orthopaedic implants

Repair of limb fractures in dogs is hindered by lack of suitable implants for every shape and size of dog. Essential biomechanical studies are "closing the gap" on this problem.

Antimicrobial stewardship in the veterinary hospital

Responsible use of antimicrobials in companion animals is essential for reducing resistance to antimicrobials required for treating infections humans. Understanding common causes of infection in hospitalised companion animals is key to appropriate antimicrobial selection.

Black Cockatoo Conservation Management

The project utilises the innovative tracking methodologies to undertake a movement ecology study of Carnaby's cockatoos, Baudin's cockatoos and forest red-tailed black cockatoos to determine habitat use and threatening processes in modified landscapes.

Focussing on Carnaby's cockatoos, the health research aims to better understand the potential role of disease as a threatening process for this species.

The research team is investigating different methodologies to age black cockatoos. The ability to age wild birds to understand age structure has significant conservation application and can help inform population viability analyses.

A documentary showcases the research being conducted and follows the journeys of PhD candidates as they track flocks of black cockatoos to gather valuable ecological and health data.

The producer Jane Hammond, draws heavily on the scientific expertise of Professor Kris Warren and Dr Jill Shepherd from Murdoch's Harry Butler Institute and School of Veterinary Medicine.

Senior Lecturer in Veterinary Anaesthesia Position Description

The role of Senior Lecturer in Veterinary Anaesthesia

The Veterinary anaesthesia team is a key section within the School of Veterinary Medicine. Team Anaesthesia provides excellence in clinical care for animals presented to The Animal Hospital whilst teaching skills and knowledge to veterinary students and undertaking innovative research to enhance small and large animal anaesthesia care capability.

The School of Veterinary Medicine (SVM) is one of 8 schools (disciplines) within the College of Science, Health, Engineering and Education.

Key responsibilities & duties

Clinical practice

Provide specialist-level clinical service in the management of small and large animal anaesthesia in The Animal Hospital at Murdoch University

Oversee anaesthesia residents for the purposes of "Immersion" requirements for residency training

Lead the clinical team while on clinical duty

Contribute to the after-hours on-call roster

Build professional profile through engagement with the WA veterinary profession

Clinical or Professional Practice – Research

Develop clinical research relevant to veterinary anaesthesia and analgesia, including contributing to successful applications for external research funding, publishing research findings in peer-reviewed journals, and demonstrating impacts on clinical practice.

Contribute to School strategic priorities in research and to partnerships with other researchers within the School and external to the School (within MU and elsewhere).

Clinical or Professional Practice – Teaching

An effective contribution to clinical or professional teaching as evidenced by:

Provide and develop clinical training in Veterinary Anaesthesia and Analgesia including delivering lectures, tutorials, practical classes, workshops, and clinical sessions

Develop assessments and undertake marking for veterinary students across the DVM course

Coordinate and/or co-coordinate undergraduate and postgraduate units including significant contributions to development and delivery of course content.

Senior Lecturer in Veterinary Anaesthesia

Position Description

The role of Senior Lecturer in Veterinary Anaesthesia

Veterinary Small & Large animal anaesthesia is a key section within the School of Veterinary Medicine. Team Anaesthesia provides excellence in clinical care for animals presented to The Animal Hospital whilst teaching skills and knowledge to veterinary students and undertaking innovative research to enhance veterinary anaesthesia capability.

The School of Veterinary Medicine (SVM) is one of 8 schools (disciplines) within the College of Science, Health, Engineering and Education.

Key responsibilities & duties

Clinical or Professional Practice – Teaching

Supervise specialty trainees, residents, coursework and research Master’s students as required

Mentor and support sessional and/or Level A and B teaching staff.

University Service and Leadership

An effective contribution to clinical or professional practice as evidenced by:

Actively promote and foster the School’s relations with the veterinary profession, and the wider community.

Practice good business management by ensuring sound supervision of staff, specialist trainees and residents, and management of client relations including invoicing for services.

Participate in School decision-making and serve on School and/or College committees.

Guiding Principles and Values

The founding principles upon which Murdoch University was established continue unabated today. We continue to be guided by the principles of:

- Equity and Social Justice
- Opportunity
- Sustainability
- Global Responsibility

Values

- Integrity
- Respect and Diversity
- Purpose
- Excellence and Future-focus

Senior Lecturer in Veterinary Anaesthesia

Position Description

Selection Criteria

- A degree in veterinary science registrable with the Veterinary Surgeons' Board of Western Australia.
- Specialist qualification in Veterinary Anaesthesia and analgesia including Fellow of Australian and New Zealand College of Veterinary Anaesthetists, Diplomat of the American College of Veterinary Anaesthesia and Analgesia, OR Diplomat of the European College of Veterinary Anaesthesia and Analgesia that would allow registration as a specialist in veterinary anaesthesia Western Australia.
- The ability to supervise anaesthesia care residents for the immersion requirements
- Demonstrated clinical knowledge, experience and capability in Veterinary Anaesthesia and Analgesia.
- Demonstrated experience in teaching veterinary students and in coaching and mentoring veterinary nurses.
- Demonstrated initiative in undertaking responsibilities, ability to work under broad direction only, work effectively as a team member and play a leadership role in teaching and learning activities.
- Evidence of clinical research experience, publications and presentations
- Ability to establish effective relationships and to represent the School of Veterinary Science to the university and wider community, including professional bodies.
- Demonstrated effective interpersonal, teamwork, negotiation, consultation skills and formal written and oral communication skills.

Code of Ethics and Code of Conduct

All staff will comply with the University's Code of Ethics and Code of Conduct and demonstrate a commitment to its Equity, Diversity and Safety principles and the general capabilities of personal effectiveness, working collaboratively and demonstrating a focus on results.

All staff are to complete a development review annually. Details of the University policies on development review can be accessed [online](#). A commencing development review should be completed within three months of commencement.

Murdoch University values workplace diversity, promotes inclusion, and strongly encourages applications from Aboriginal and Torres Strait Islander people, women, and people with disability.

Applicants who have support or access requirements, are encouraged to advise this at the time of their application, to ensure appropriate assistance is provided throughout the recruitment process.

College of Veterinary Medicine

Application process

At Murdoch University, we review your application alongside a dedicated selection committee. To ensure we're identifying and assessing qualified candidates for the role, we have highlighted the process below.

Your application should consist of:

1. A covering letter including a statement addressing the selection criteria (with reference to the position description).
2. A comprehensive CV including:
 - Full name, address, mobile and telephone number(s) and email address
 - Names, telephone numbers and email contact of at least three referees including current/most recent supervisor (no contact will be made without your permission)
 - Employment history including present position and notice required, and an indication of the earliest date on which you would be able to commence
 - Details of qualifications and professional memberships
 - Confirmation of your right to work in Australia

All enquiries should be directed in confidence to:

d.marchesi@murdoch.edu.au

The deadline for applications is
2nd September 2023

Our location

Murdoch University has Australian campuses in Perth, Mandurah and Rockingham, offshore campuses in Singapore and Dubai and a CBD space in the heart of Perth – the forerunner to the development of a Vertical Campus in Perth's CBD by 2024.

Western Australia covers one-third of the Australian continent, spanning over 2.5 million square kilometres (one million square miles) and several different climatic zones. With the fastest growing economy in the country, Western Australia is widely regarded as the 'powerhouse' of the nation's economy with an ambitious international outlook and sharing the same time zone as 60% of the world's population.

Our main South Street campus is in Perth, the capital of Western Australia, close to the city centre and easily accessible by train, bus, bike or car. With a population of more than 2.1 million people, Perth is a thriving, cosmopolitan city ranked as the sixth most liveable city on the planet in the Global Liveability Index for 2021. Perth's fast-evolving cultural offerings include art galleries, theatre companies and museums, international film and writers' festivals, and the world-renowned Perth International Arts Festival.

Western Australia also has many world-class sporting facilities and, whatever your preference, Perth has plenty of options to pick from including Australian Rules Football, football, rugby, cricket, basketball and netball.

Perth's CBD is located on the banks of the Swan River while the greater Perth region boasts an array of unparalleled pristine beaches and enjoys more hours of sunshine than any other capital city in Australia.

This is the perfect climate in which to enjoy a healthy outdoor lifestyle. Cycling, surfing, kayaking, golf and sailing are among our many popular past times. With a sophisticated mix of cafes, restaurants, boutiques and department stores – and premium wineries, uncrowded beaches and bushland within easy reach – there can be no doubt this is a fabulous place to live and work, both for professionals and their families.

For your down time, leave the everyday behind Experience otherworldly phenomena and majestic landscapes, awe-inspiring wilderness, and boundless natural adventures within Western Australia:

<https://www.westernaustralia.com/au/home>

Perth is a thriving, cosmopolitan city ranked as the sixth most liveable city on the planet.

We have a range of salary packaging options available, consisting of but not limited to:

- Campus car parking
- Murdoch Active gym membership
- Active kids holiday program
- Airline lounge membership
- Financial consultation
- Electronic devices!
- Self-Education
- Motor vehicles

Why Murdoch?

At Murdoch University, we have an abundance of exciting benefits on offer for our valued employees!

Our People enjoy a lively, natural campus and world class facilities, as well as a range of benefits including:

- Competitive Remuneration
- Paid leave entitlements
- Flexible work arrangements
- Employee counselling services
- Staff discounts available!
- On Campus gym
- Childcare facilities
- Salary Packaging arrangements!
